FUCHS' Titan ATF 4400 and ATF 6400 provide coverage for over 1

\*As per market analysis conducted by Fuchs Lubricants (Australasia) Pty Ltd, Feb 2020

Ultra High Performance ATF

# TITAN ATF 4400

TITAN ATF 4400 Ultra High Performance ATF specifically formulated for Japanese passenger and light commercial vehicles as well as transmissions used by several European and American manufacturers.

Although TITAN ATF 4400 has been designed for AISIN WARNER automatic-transmissions used in a large number of passenger and light duty vehicles of Japanese make, it is also suitable for use in a large selection of American and European models.

Due to its outstanding properties TITAN ATF 4400 can also be used in many aggregates of Asian origin or where DEXRON III-type fluids are demanded.

And as TITAN ATF 4400 (part number: 4935) has been totally updated – and replaces the old TITAN ATF 4400 (part number: 3970) – special effort should be made to ensure this product is used within the correct vehicles.

Premium Performance ATF

# TITAN ATF 6400

TITAN ATF 6400 is a Premium Performance ATF with reduced viscosity specifically formulated for automatic transmissions of Japanese and American manufacturers. In addition, it is also licensed according to DEXRON VI and MERCON LV.

TITAN ATF 6400 has been specially designed to deliver performance and increased fuel efficiency for modern automatic transmissions of Japanese and American manufacturers where reduced viscosity is required and meets the stringent DEXRON-VI and MERCON LV specifications.

Along with providing exceptional anti-shudder performance and consistent and strong friction control properties, TITAN ATF 6400 is also supported by real-world testing conducted from 1 million kilometres.

And as DEXRON VI is strictly backwards compatible in GM applications, TITAN ATF 6400 can also be used in older GM automatic transmissions.

Fuchs also recommend the following Automatic Transmission Fluids:

## TITAN ATF 6006

An ultra-high performance automatic transmission fluid, TITAN ATF 6006 has been specially developed to optimise the shifting performance of selected ZF automatic transmissions.

In addition, TITAN ATF 6006 features a reduced viscosity to optimise the performance of specific 6-speed ZF automatic transmissions.

Along with delivering good friction control, TITAN ATF 6006 also features excellent durability and oxidation control which provides long oil life with proven performance across a wide range of vehicles.

## TITAN ATF 6008

A premium performance automatic transmission fluid, TITAN ATF 6008 has been specially developed to optimise the shifting performance of selected ZF automatic transmissions.

In addition, TITAN ATF 6008 features a reduced viscosity to optimise the performance of specific 6 as well as 8-speed ZF automatic transmissions.

Along with its strong anti-shudder performance, improved friction control, excellent oxidation performance and wear protection, TITAN ATF 6008 has also been created for usage across a diverse range of range of vehicles.
