Driving Tips for your Summer Holiday

- Take time to make sure that you and your vehicle are safe before starting your journey.
- Plan your travel to avoid the worst peak traffic periods when many highways become congested. ...
- Allow plenty of time – make the journey part of the holiday.
- Schedule regular rest stops.
- Maintain a longer appropriate safety distance. This may be more difficult if roads are crowded.
- Remember that roads become very slippery in the first few minutes of rainfall because the rain mixes with the oil and dirt on the road.
- During summer period there's often more work being done on the road. Stay alert, note warning signs and slowdown in construction zones.
- Holiday travellers can be unfamiliar with the area and/or their vehicle (which is sometimes larger than they are used to) and make sudden, unexpected manoeuvres which leads to new hazards.

Stay safe and enjoy our beautiful Country
