

## OUR SUPPORT OF LUUKA SHINES SILVER

How inspirational was Luuka Jones at the Olympic Games in Rio de Janeiro. Getting up early to watch the semi and wondering if she would make the final was not made any easier when she did not have a great run and qualified seventh. However, there was that sense of pride that comes with watching Kiwis and a gut wrenching feeling that she could do better than that.

The Finals were a nail biting affair and the levels of excitement and expectation rose when Luuka had a stunning run down the challenging 24 gate 242 metre course with a time of 101.82 seconds which saw her briefly hold the gold medal position. The wait was agonising and made worse when it looked like the Aussie was about to steal the gold or silver but then the time penalty saw Luuka back on top. The run from the Spain's Maialen Chourraut at 98.65 saw Luuka win the Silver Medal. Luuka was left with a surreal feeling having gone from her 26th world ranking to number 2 at the Olympics and winning the first ever medal for New Zealand in the white water.

CONGRATULATIONS LUUKA JONES YOUR DEDICATION & HARD WORK WON ON THE DAY!!

## BARRY HARRIS IS NEW BOARD CHAIR

"I am really pleased to join the team at McFall Fuel. The Conference at Taupo reinforced to me the great mix of people and commitment to this successful family business. Having watched the growth of the company with admiration for a number of years Conference reinforced the values that Morris and Hillary's have and these have not changed. Morris, along with others gave me a start in the early years that kicked off a great career," said Barry. He and wife Wendy enjoy travelling, fishing, playing tennis, being with their family, and chasing rugby games around the world. As the new Chairman, Barry brings experience as a director of a number of companies, as along with that drawn from being a Chief Executive in both government and the private sector. Having had responsibility for 500 tankers as head of milk supply for Fonterra Barry will now need to learn about the challenges of fuel rather than milk. (Barry pictured at a Conference activity)

## TRAILER TANKS LEASE TO OWN

The trailer tanks available are 1350 and 1800 braked tandem axles with all of the latest safety features and requirements. They can be painted in your Company colours and are offered over a 36 month lease to own period.

## EMAILING OF INVOICES AND STATEMENTS

We would like to encourage customers to receive their invoices and statements by email.

If you would like your invoices and statements emailed all you need to do is contact our Finance & Administration team with your details by using our email.

## SUPPORTING COMMUNITY EVENTS

McFall Fuel was pleased to be able to support the North Island ATV Championships recently held in Tokoroa. Competitors came from as far away as Christchurch and enjoyed the challenges of the first class event. Ian Ffitch, NZ's number one ATV and Super Quad rider won his class. There was also a strong field of female competitors of all ages.

On the same weekend Clinton Cunningham was competing in the New Zealand Rally Championship at the Goldrush Rally in Coromandel. This weekend

did not go well for Clinton who was denied a top five finish by technicalities within the rule book. McFall Fuel have been involved with Clinton and his team for four years, sharing the highs and the lows.

## SPRING PROMOTION OFFERS ROD & REEL COMBO

McFall Fuel's research in the market place has revealed that the use of a high quality hydraulic oil reduces the wear and tear on pumps and minimises the damage caused by the temperature fluctuations that can occur. A number of our customers have commented that the higher grade is offering much better outcomes particularly for their machinery operating hard out all day.

**FOR EVERY 100 LITRES PURCHASED YOU GO INTO THE DRAW TO WIN  
ROD & REEL COMBOS**

## WORK RELATED DISEASE IS THE REAL KILLER

We all know that when it comes to health and safety in New Zealand our record has not been good. While on average one person dies each week at work, it is interesting to learn that since 1999 around 600 to 900 people a year have died from work related disease with around 30,000 people suffering from work related conditions annually. These statistics provide quite a jolt and clearly illustrate we need to be vigilant about the ingredients that are in the substances we use and of course the many risks that occur in any workplace.

Beyond the biological, chemical, and physical risks there are the risks like bullying, stress, and excessive workloads. Not to forget the gradual impairment that may occur like hearing or loss of sight.

Like all HSE issues, it is the ongoing discussions that people need to

be having about health in the work place.
